# ETHAN NELSON

(770) 689-7042 | ethanisaacnelson@gmail.com | linkedin.com/in/ethan-nelson/ | https://einelson.github.io/ | Secret Clearance

## **Professional Experience**

#### Senior Associate, Analytics

Jan 2022-Present

iProspect

Remote

- Leading efforts in automation of reports and insight generation.
- Facilitating setup of automated data pipelines by managing team of data engineers.
- Building data scripts to transform and join data to help case study dealing with 50% unattributed data points

   The first and the second state of the second s

**Software Engineer** 

May 2021-Dec 2021

**ARCTEC Solutions** 

Middleburg, VA

- Automated software installation tasks.
- Created data dissemination tool to pull data from APIs and remote databases to store into a local database.

Data Science Intern
Snow Data Science

Jan 2021-April 2021

Remote

- Used data visualization to create results that were easily interpreted by humans.
  - Researched unsupervised machine learning algorithms pertaining to clustering and use of dimensionality reduction (PCA).

#### Data Reviewer, Annotator

Feb 2020-Jan 2021

Research & Business Development Center

Rexburg, ID

- Conducted research under a Machine Learning Engineer in order to increase working knowledge on machine learning algorithms specifically dealing with neural networks, semantic segmentation, and point cloud classification.
- Built <u>neural network</u> with Point Net and TensorFlow to classify point cloud data to help achieve a fully automated warehouse.

# **Research Projects**

**Fault Detection**- Research on predicting faults in oil pipelines. Use of unsupervised machine learning and dimension reduction to predict and then visualize groupings. Sponsored by <a href="Snow Data Science">Snow Data Science</a>.

**Image Colorization-** Predicted the colored counterpart of grayscale images. Research into different color spaces such as LAB. Applied findings to different use cases such as image compression.

**Point Cloud Classification**- Use of neural networks to predict classification of point cloud images for use in robotic warehouses. Dealt with lidar imagery.

# **Technical Experience**

- Python 2.7, 3
- Machine Learning, Al
- Deep Learning
- Tensorflow/ Keras

- SQL/ NoSQL
- Computer vision
- Object oriented (OOP)
- Linux (Ubuntu, RedHat)
- 3D modeling (Autodesk Inventor)
- Agile/ Scrum
- Debugging
- Networking

### Education

### **Georgia Institute of Technology**

2022-Present

MS. Science in Computer Science | Specialization in Interactive Intelligence

Remote

### **Brigham Young University-Idaho**

2018-2021

BS. Science in Computer Science

Rexburg, ID

Data Career Jumpstart

2021

Data science project experience

Remote
